PROJECTS

Movie Recommendation System | Python, ML, NLP, Scikit-Learn | https://github.com/Nil-0107/Movie_recom.git

Architected a high-performance REST API using FastAPI and Uvicorn to serve movie recommendations in real-time.

Built a content-based engine utilizing TF-IDF Vectorization and Cosine Similarity to suggest movies based on metadata.

Optimized data handling with Pandas to process thousands of entries for accurate text analysis and model inference.

Full-Stack Web Application | MERN Stack | <https://html-starter-delta-eight-24.vercel.app/>

Designed and implemented a responsive web application featuring a RESTful API and database integration. Focused on frontend UI/UX using React and backend logic with Node/Express.
